Author Index Volume 145 (2002)

Afif, M. and **B. Amaziane,** On convergence of finite volume schemes for one-dimensional two-phase flow in porous media 31– 48
Alfaro, M., M. Álvarez de Morales and **M.L. Rezola,** Orthogonality of the Jacobi polynomials with negative integer parameters 379–386
Álvarez de Morales, M., see **Alfaro, M.** 379–386
Amaziane, B., see **Afif, M.** 31– 48

Boyadjiev, T.L., M.D. Todorov, P.P. Fiziev and **S.S. Yazadjiev,** A numerical algorithm for modelling of boson–fermion stars in dilatonic gravity 113–131

Calvo, M. and **J.M. Oller,** A distance between elliptical distributions based in an embedding into the Siegel group 319–334
Cao, Z.-H., On the convergence of iterative methods for solving singular linear systems 1– 9
Cesarano, C., see **Dattoli, G.** 417–424
Chapko, R., The numerical solution of an evolution problem of second order in time on a closed smooth boundary 493–503
Chen, S., S.-C. Fang and **H.-S. Jacob Tsao,** Entropic perturbation method for solving a system of linear inequalities 133–149

Dai, W. and **R. Nassar,** An unconditionally stable finite difference scheme for solving a 3D heat transport equation in a sub-microscale thin film 247–260
Dattoli, G., P.E. Ricci and **C. Cesarano,** A note on multi-index polynomials of Dickson type and their applications in quantum optics 417–424
de Bruin, M.G., Regularity of some 'incomplete' Pál-type interpolation problems 407–415
De Marchi, S., A. Ligun, S. Timchenko and **A. Shumeiko,** An interpolant defined by subdivision and the analysis of the error 71– 88
Dyn, N., M.S. Floater and **A. Iske,** Adaptive thinning for bivariate scattered data 505–517

Fang, S.-C., see **Chen, S.** 133–149
Farkas, G., A numerical C^1-shadowing result for retarded functional differential equations 269–289
Feng, B.-F. and **G.W. Wei,** A comparison of the spectral and the discrete singular convolution schemes for the KdV-type equations 183–188
Fiziev, P.P., see **Boyadjiev, T.L.** 113–131
Floater, M.S., see **Dyn, N.** 505–517

Gilewicz, J., M. Pindor, J.J. Telega and **S. Tokarzewski,** Continued fractions, two-point Padé approximants and errors in the Stieltjes case 99–112

Harada, K., see **Kotakemori, H.** 373–378

Iske, A., see **Dyn, N.** 505–517

Jacob Tsao, H.-S., see **Chen, S.** 133–149

Kohaupt, L., Differential calculus for p-norms of complex-valued vector functions with applications 425–457
Kondo, K. and **Y. Nakamura,** Determinantal solutions of solvable chaotic systems 361–372
Kotakemori, H., K. Harada, M. Morimoto and **H. Niki,** A comparison theorem for the iterative method with the preconditioner $(I + S_{\max})$ 373–378
Koto, T., Stability of Runge–Kutta methods for delay integro-differential equations 483–492
Kouatchou, J., see **Zhang, J.** 213–222
Kumar, M., A three-point finite difference method for a class of singular two-point boundary value problems 89– 97

Lasser, R., On lag windows connected with Jacobi polynomials 291–300
Li, X.-F. and **E.-Q. Rong,** Solution of a class of two-dimensional integral equations 335–343
Ligun, A., see **De Marchi, S.** 71– 88
Liu, G.R. and **T.Y. Wu,** Differential quadrature solutions of eighth-order boundary-value differential equations 223–235
Liu, J., Numerical solution of forward and backward problem for 2-D heat conduction equation 459–482
Lubinsky, D.S. and **H.P. Mashele,** L_p boundedness of $(C, 1)$ means of orthonormal expansions for general exponential weights 387–405

MacLeod, A.J., Rational expressions for the zeros of several special functions 237–246
MacLeod, A.J., Asymptotic expansions for the zeros of certain special functions 261–267

PII: S0377-0427(02)00549-6

Martínez-Finkelshtein, A., P. Martínez-González and **A. Zarzo,** WKB approach to zero distribution of solutions of linear second order differential equations 167–182
Martínez-González, P., see **Martínez-Finkelshtein, A.** 167–182
Mashele, H.P., see **Lubinsky, D.S.** 387–405
Matthews, S., E. O'Riordan and **G.I. Shishkin,** A numerical method for a system of singularly perturbed reaction–diffusion equations 151–166
Morimoto, M., see **Kotakemori, H.** 373–378

Nakamura, Y., see **Kondo, K.** 361–372
Nassar, R., see **Dai, W.** 247–260
Naylor, D., An asymptotic expansion of the Kontorovich–Lebedev transform of damped oscillatory functions 21– 30
Niki, H., see **Kotakemori, H.** 373–378

O'Riordan, E., see **Matthews, S.** 151–166
Oller, J.M., see **Calvo, M.** 319–334
Othman, M., see **Zhang, J.** 213–222

Pardo, J.A., see **Pérez, T.** 301–317
Pennacchio, M. and **V. Simoncini,** Efficient algebraic solution of reaction–diffusion systems for the cardiac excitation process 49– 70
Pérez, T. and **J.A. Pardo,** Asymptotic normality for the K_ϕ-divergence goodness-of-fit tests 301–317
Petković, M.S., Comments on some recent methods for the simultaneous determination of polynomial zeros 519–524
Petras, K., Self-validating integration and approximation of piecewise analytic functions 345–359
Pindor, M., see **Gilewicz, J.** 99–112

Quintanilla, R., Exponential stability for one-dimensional problem of swelling porous elastic soils with fluid saturation 525–533

Rezola, M.L., see **Alfaro, M.** 379–386
Ricci, P.E., see **Dattoli, G.** 417–424
Rong, E.-Q., see **Li, X.-F.** 335–343

Schulz, M. and **G. Steinebach,** Two-dimensional modelling of the river Rhine 11– 20
Shishkin, G.I., see **Matthews, S.** 151–166
Shumeiko, A., see **De Marchi, S.** 71– 88
Simoncini, V., see **Pennacchio, M.** 49– 70
Sirotkin, V. and **P. Tarvainen,** Parallel Schwarz methods for convection-dominated semilinear diffusion problems 189–211
Steinebach, G., see **Schulz, M.** 11– 20

Tarvainen, P., see **Sirotkin, V.** 189–211
Telega, J.J., see **Gilewicz, J.** 99–112
Timchenko, S., see **De Marchi, S.** 71– 88
Todorov, M.D., see **Boyadjiev, T.L.** 113–131
Tokarzewski, S., see **Gilewicz, J.** 99–112

Wei, G.W., see **Feng, B.-F.** 183–188
Wu, T.Y., see **Liu, G.R.** 223–235

Yazadjiev, S.S., see **Boyadjiev, T.L.** 113–131

Zarzo, A., see **Martínez-Finkelshtein, A.** 167–182
Zhang J., J. Kouatchou and **M. Othman,** On cyclic reduction and finite difference schemes 213–222
